

Exercise Number : 1

**Title of the Exercise : identifying Networking Hardware components
(Jacks, Cables, Tools)**

Date of the Exercise :

Aim : To study and identify Networking Hardware components

Procedure :

Crimping Tools :

A crimping tool is a device used to conjoin two pieces of metal by deforming one or both of them to hold each other. The result of the tool's work is called a crimp. An example of crimping is affixing a connector to the end of a cable. For instance, network cables and phone cables are created using a crimping tool (shown below) to join RJ-45 and RJ-11 connectors to both ends of phone or Cat 5 cable.
